

EAPCCT Congresses 1994-2010: Special Themes

Clinical Toxicology and *Poisons Centres Activities*
have been topics in all Congresses

Bordeaux 2010

Pre-Congress: Investigation of the poisoned patient
Main Congress: Paracetamol toxicology - what's new
Optimising research in poison centres
Preparedness for unusual toxic outbreaks
Toxic alcohols
Management of drug and alcohol withdrawal
Critical care toxicology

Stockholm 2009

Pre-Congress: Poisoning in special patient groups
Main Congress: Controversies in Clinical Toxicology
Laboratory investigations in the poisoned patient
Practical problems in clinical toxicology (case discussion)
Diversity of Poisons Centre activities
Toxinology
Heavy metals
Adverse Drug Reactions and toxicosurveillance
Poster Discussion

Seville 2008

Pre-Congress: Poisoning in the workplace
Main Congress: Antidote update; Charcoal
New legislation affecting Poisons Centres
Newer pesticides
On-line information sources
Prevention of poisoning
Toxicity of complementary and alternative medicines
Veterinary toxicology

Athens 2007

Pre-Congress: Mechanisms of toxicity and their clinical relevance
Main Congress: Forensic toxicology
Controversies in Clinical Toxicology
Provision of high quality cost effective poisons information
Translating the evidence base into clinical practice and behaviour
Difficult, unusual, or important poisonings

EAPCCT Congresses 1994-2010: Special Themes

Clinical Toxicology and *Poisons Centres Activities*
have been topics in all Congresses

Prague 2006

Pre-Congress:	Research methods in toxicology
Main Congress:	Assessment and management of the acutely poisoned patient Education in Clinical Toxicology Antidotes (free communications) Poisoning in special patient groups Toxicoepidemiology Controversies in the management of poisoning Unusual but important poisonings Scientific basis of toxicity

Berlin 2005

Pre-Congress:	Drugs of abuse
Main Congress:	Clinical trials in Clinical Toxicology: Developing the evidence base Developing the evidence base for best practice in Poisons Centres Pesticide poisoning: the evidence base Clinical Toxicology and environmental pollution Poisons Centres: IT and surveillance

Strasbourg 2004

Pre-Congress:	Chemical terrorism
Main Congress:	Controversies in the treatment of carbon monoxide poisoning Controversies in antidote use in the pre-hospital situation Controversies in managing chemical injuries Controversies in managing mushroom toxicity Intensive care and clinical management of poisoning Paracetamol Clinical Toxicology over 40 years

Rome 2003

Pre-Congress:	Neuropharmacology and neurotoxicity
Main Congress:	Critical review of antidotes Occupational toxicology Impact of air pollution on health Nerve agents Harmonisation of poisons information data sheets in Europe

EAPCCT Congresses 1994-2010: Special Themes

Clinical Toxicology and *Poisons Centres Activities*
have been topics in all Congresses

Lisbon 2002

Pre-Congress:	Warfare agents
Main Congress:	Poison-induced organ toxicity (mechanisms, prevention of organ failure, transplantation following intoxication) Elimination techniques in the intoxicated patient Iatrogenic intoxications Poisons Centre epidemiological studies and the consequences for the prevention of poisoning Natural toxins Position statement on urine alkalization Assessment of risks from environmental exposures

Barcelona 2001

Pre-Congress:	Influence of metabolic polymorphisms on poisoning Drug interactions in overdose Implications of toxic dynamics for admission and discharge of patients
Main Congress:	Heavy metal toxicity Metabolic consequences of poisoning Pediatric poisoning Poisoning due to ethnic remedies Poisons Centre structure, quality improvement, and certification Organophosphate poisoning

Amsterdam 2000

Pre-Congress:	Cardiovascular disturbances in acute poisoning
Main Congress:	Contemporary substances of abuse Quality and accreditation of Poisons Centres Clinical implication of toxicokinetics and toxicodynamics Risk assessment after acute and chronic compound exposure Metal toxicity Pesticide poisoning Natural toxins

EAPCCT Congresses 1994-2010: Special Themes

Clinical Toxicology and *Poisons Centres Activities*
have been topics in all Congresses

Dublin 1999

Pre-Congress:	Toxic syndromes in acute poisoning Deliberate chemical releases
Main Congress:	Pesticides (pyrethroids, organophosphates, carbamates, paraquat, diquat, glyphosate) Toxicological emergencies Quality assurance in Poisons Centres Natural toxins Recent advances in Clinical Toxicology

Zürich 1998

Pre-Congress:	Kinetics and dynamics in the poisoned patient
Main Congress:	Hepatotoxicity of xenobiotics: Mechanisms and treatment Acute poisoning Reprotoxicity Risk assessment and environmental toxicity New methods of information delivery: quality improvement in Poisons Centres EAPCCT/AACT Position Statements on elimination techniques Lithium poisoning Poisoning and world history

Oslo 1997

Main Congress:	Antidotes
----------------	-----------

Marseille 1996

Main Congress:	Natural toxins Substances of abuse Mechanisms of toxicity, features, and management Gut decontamination Epidemiology Heavy metals
----------------	--------------------------------------------------------------------------------------------------------------------------------------------------

Krakow 1995

Main Congress:	Occupational exposure Metal toxicity Pesticides Environmental toxicology
----------------	-----------------------------------------------------------------------------------
